

Task 2

Written Reflection

In this essay, I will be talking about the statement 'Be the change that you want to see in the world'. I will be also discussing about some changes that I would like to make in Malta and at MCAST. Then, I will be also talking about skills that are most relevant to me and reflecting on an activity that was done in class.

'Be the change that you want to see in the world'.

This quote is the short version of what Mahatma Gandhi had said. Basically, this quote is telling us that we should not wait for others to change the world for us but, we should be the change for others. I would like to make a good impact in the world for the next generation by inspiring others to have a positive attitude towards life even if they have certain difficulties. In my own opinion, best way to inspire others is to lead by example. In my experience, to be positive helped me to be able to face my disability and continue enjoying my life even if I have some difficulties.

Change in Malta

A change that I would like to see in Malta is about the environment. We are already aware that it is important for our lives as it is our home. The environment is a large spectrum that we must take care of since it has a lot of potential on ourselves, animals, and nature. I would like to change the way the rubbish is managed since it is ruining the environment of the Maltese islands including the sea, countryside, and air.

Reflection

In my opinion, the first thing that should be tackled is the way people handle this issue by trying to educate them to make more effort and dispose of their rubbish responsibly. From my perspective, I think that the rubbish should be collected more frequently especially the organic and general rubbish since it smells and attracts insects. Another thing is that foreigners and tourists should be aware of the rules in this regard by offer more information in airports, hotels, rental apartments etc.

Change in my College

The change that I would like to see at the Institute for Creative Arts is that hybrid lessons will be implemented. Mainly there are two reasons that I believe in. The first one is that the college is overpopulated with very limited space. The second reason is that the students waste a lot of time travelling and stuck in traffic.

Reflection

From my point of view as a student, I believe that this is possible if the timetable will be done differently by taking in consideration which lessons can be easily done online and which lessons must be on campus. As well, the timetable should be back-to-back when on campus. I believe that the students will have more time to work on their assignments and one should not forget students who must do extra jobs to make ends meet. This might reduce anxiety and mental health issues.

4 Skills that are Relevant to me

- **Self-care**- it is one of the most important skills because taking care of ourselves, avoid to have mental health issues. This is meant to avoid some stress and anxiety, keep physically fit, and emotionally happy. We can take care of ourselves by prioritising sleep, healthy eating, meeting with good friends, and have a good laugh.
- **Empathy** - one of the important skills that I believe in. We all know that we should try to understand and listen to others. This helps to work better in a teamwork, relate better with the clients, understand the views of your colleagues, and to be able to motivate others.
- **Creativity** – it is one of the hardest skills to achieve since to be creative, you must think outside the box if you want to be unique, innovative, and original. Professional success sometimes depends on the ability of the person's creativity since we should be problem solvers and thinking differently.
- **Non-verbal Communication** – This is a communication skill that we use all the time. It is important for us to do presentations, interviews, and communicating via body language.

Reflection on one activity

I think that the quiz about the teamwork was very interesting and important. It helped me to understand better my role in a teamwork and my strengths.

My result was that I am a Team Driver. To be honest, I was not surprised by the result although I am not exactly a leader. Usually in teamwork I like to be more on the creative side, but if I notice that the team has problems in communicating or very tight with deadlines, I will send messages as a reminder to keep our timeframe and give them a hand when needed.

After we all done the quiz, we had a class discussion about our results which made me understand better my colleagues and know them better, since I did not know most of my classmates.
